

Mansour Saffar M.

Machine Learning Engineer

+1 (587) 937 0770 | [linkedin.com/in/msaffarm](https://www.linkedin.com/in/msaffarm) | github.com/msaffarm | msaffarmehrdjardy@gmail.com

Work Experience

- 03/18 - Now **Machine Learning Developer (Part-time)** [AltaML, Edmonton](#)
- Designed and helped to develop a **data generation framework** for training **task-oriented chatbots**. This framework enabled us to (1): create **high-quality training data** (covering most of the real-world scenarios) for specific domains which no data was available and (2): develop **multi-domain chatbots**.
 - Researched and trained **Natural Language Understanding (NLU)** models for task-oriented chatbots. Given the need for a robust NLU model for our chatbot pipeline, I developed NLU models with high accuracy/F1-score (+93%) for user intent classification and entity extraction.
 - Technologies: Python, Rasa, ParlAI, spaCy, NLTK, Scikit-learn, MongoDB, Pandas, AWS, Git, Docker*
- 05/17 - 08/17 **Data Analyst Intern** [Finning Canada, Edmonton](#)
- Created regression models for rental machinery residual value prediction using **ensemble methods (Random Forest and GBRT)** with high R^2 (+90%).
 - Developed a **recommender system** using **association rule mining** method. Faced with the problem of a large number of records, I augmented the system with specific data structures for speed-up.
 - Technologies: Python, C++, Pandas, Scikit-learn, H2O, XGBoost, LightGBM, Azure ML, MySQL, Microsoft SSMS, Plotly*

Selected Projects

- 09/17 - 11/18 **Deep Learning Models for Task-oriented Chatbots** [Graduate Research Assistant \(Master's Thesis\)](#)
- Given the success of **self-attentional models** in machine translation, I researched usage of them for task-oriented chatbots. The results showed faster training with comparable accuracy. [Source Code]
 - Developed an **evaluation method for task-oriented chatbots** using profile-conditioned user simulator. This method can model **user characteristic** and behavior in chatbot evaluation.
 - Technologies: Python, Tensorflow (tensorflow/tensor), Rasa, Git*
- 09/16 - 11/16 **Retinal Image Segmentation** [Machine Learning Course](#)
- Developed segmentation model by applying **ensemble and SVM models** on retinal images. Faced with the problem of small dataset size, we achieved good results by using bagging methods. [Report Link]
 - Technologies: Python, MATLAB*
- 04/15 - 04/16 **Classification of Epileptic Patients** [Bachelor's Thesis](#)
- Applied **SVM and Kernel SVM models** on statistical and textual information extracted from brain MRIs to detect epileptic patients.
 - Technologies: Python, MATLAB*

Education

- 2016 - 2019 **M.Sc in Computer Science (4/4)** [University of Alberta, Edmonton](#)
- Expected graduation date: February 2019
 - Relevant Coursework: **Reinforcement Learning, Deep Learning, Machine Learning**, Data Mining
 - Supervisor: Prof. Osmar Zaiane
 - Thesis: "Self-attentional Models Application for Task-oriented Dialogue Generation Systems"
- 2011 - 2016 **B.Sc in Electrical Engineering (3.67/4)** [University of Tehran, Tehran](#)
- Relevant Coursework: **Data Structures and Algorithms, Advanced Programming**, Pattern Recognition, Introduction to Artificial Intelligence, Linear Algebra
 - Thesis: "Classification and Detection of Epileptic Patients Using Brain MRI Images"

Technical Skills

Expertise	Areas of Expertise: <i>Machine Learning, Deep Learning, Natural Language Processing, Conversational AI</i>
Languages	Programming Languages: <i>Python (4+ years), C++ & MATLAB (Proficient), Java (Intermediate)</i>
ML/DL Tools	Machine Learning & Deep Learning Libraries: <i>Scikit-learn, H2O, Tensorflow, Familiar with Pytorch</i>
Optimization	Numerical Analysis & Optimization Libraries: <i>NumPy, SciPy, hyperopt</i>
NLP	Natural Language Processing & Conversational AI Libraries: <i>spaCy, NLTK, Gensim, Rasa (Core & NLU), ParlAI</i>
Big Data	Big Data Analysis Frameworks: <i>Familiar with Hadoop, Apache Spark (PySpark)</i>
Database	Data Management & Munging: <i>MySQL, Pandas, MongoDB, Redis [Udemy Certificate]</i>
Cloud	Cloud Computing Platforms: <i>AWS (EC2, S3, Lambda), Microsoft Azure (ML)</i>
Tools	Software Development Tools: <i>Git, Docker [Udemy Certificate], AWS CLI</i>

Teaching Assistantships

Fall 2017	Reinforcement Learning in Artificial Intelligence University of Alberta, Edmonton <ul style="list-style-type: none">• A comprehensive course on reinforcement learning. Besides grading, I collaborated with 10 TAs in the labs to help 250 students with their programming assignments.
Fall 2016	Introduction to Foundations of Computation University of Alberta, Edmonton <ul style="list-style-type: none">• An introduction to data structures in Python. I ran weekly labs and taught data structure concepts and Python programming to the students in my lab and held office hours to help them with their assignments.

Volunteering

2014 - 2015	Chief Editor <ul style="list-style-type: none">• Chief editor of Biotech journal published by University of Tehran student branch of ISBME. I managed 5 students in order to publish a monthly magazine about the latest innovations in biomedical engineering.
Winter 2014	Event Organizer <ul style="list-style-type: none">• Helped in organizing the first biomedical engineering technical ideas competition (Ideas Bazaar) with cooperation of Amirkabir University of Technology.
